Great sound. Engineered. We make life sound better

Great sound is so much more than *just* sound. It's a way of transforming lives. That's why we make it our life's work to be the experts who deliver incredible sound. We believe that having some of the world's best sound engineers, in addition to the most advanced acoustic testing and development facilities, enables us to make solutions that are truly intelligent and beneficial.

Engineered for purpose

Hundreds of hours of research and meticulous engineering go into every Jabra product. The result? Products that are innovatively engineered for purpose, and that will help to make what you do better, more efficient, and more productive.

“The spirit of the GN Group inspires us to break boundaries. We created the world's first ultra noise-cancelling microphone.”

Jabra is proud to be part of the GN Group – a brave and inventive group of people who have been breaking frontiers for 150 years. From our home in Copenhagen, Denmark, the GN Group revolutionized communications by laying the world's first submarine cable, which carried the first telegraph line linking East to West and brought the world closer together.

The spirit of the GN Group inspires us to break boundaries of our own – for example we've created the world's first ultra noise-cancelling microphone, the world's first Bluetooth® headset, and the world's first sports headphones with integrated heart-rate monitor, to name just a few.

Pushing creative limits

And we don't just share the GN Group's pioneering spirit, we share their knowledge and expertise, too. Our engineers advance technology, set new standards, and push their limits, sharing what they create within our group. Consumer tech makes its way into professional tech, while medical-grade sound solutions make their way into consumer products, and always with the same goal – to make life sound better.

Thanks to our close relationship with ReSound, our sister brand, we have unrivalled sound capabilities. ReSound are world-leading hearing-aid experts who blend design and technology to bring people with hearing loss closer to the things they love.

Personalized hearing experience

These powerful, discreet, and smart hearing aids can now be controlled by integrated apps. This delivers a natural, personalized hearing experience and can transform the hearing aids into wireless stereo headphones.

Anyone can make sound, but we settle for nothing less than the world's best. Because great sound isn't just made.

It's Jabra engineered.

Unified Communications

Our sound solutions help you get the full benefit from your UC investment through amazing sound and simple, easy to use sound devices.

At Jabra, we focus on the individuals that make up the organization. Behind each Jabra sound device is a person who needs to adapt to new technology and embrace new ways of working.

To help them adapt to the new reality, we map the exact ways they'll use our products to create value – meaning you get the productivity you'd expect from our products.

What Is Unified Communications?

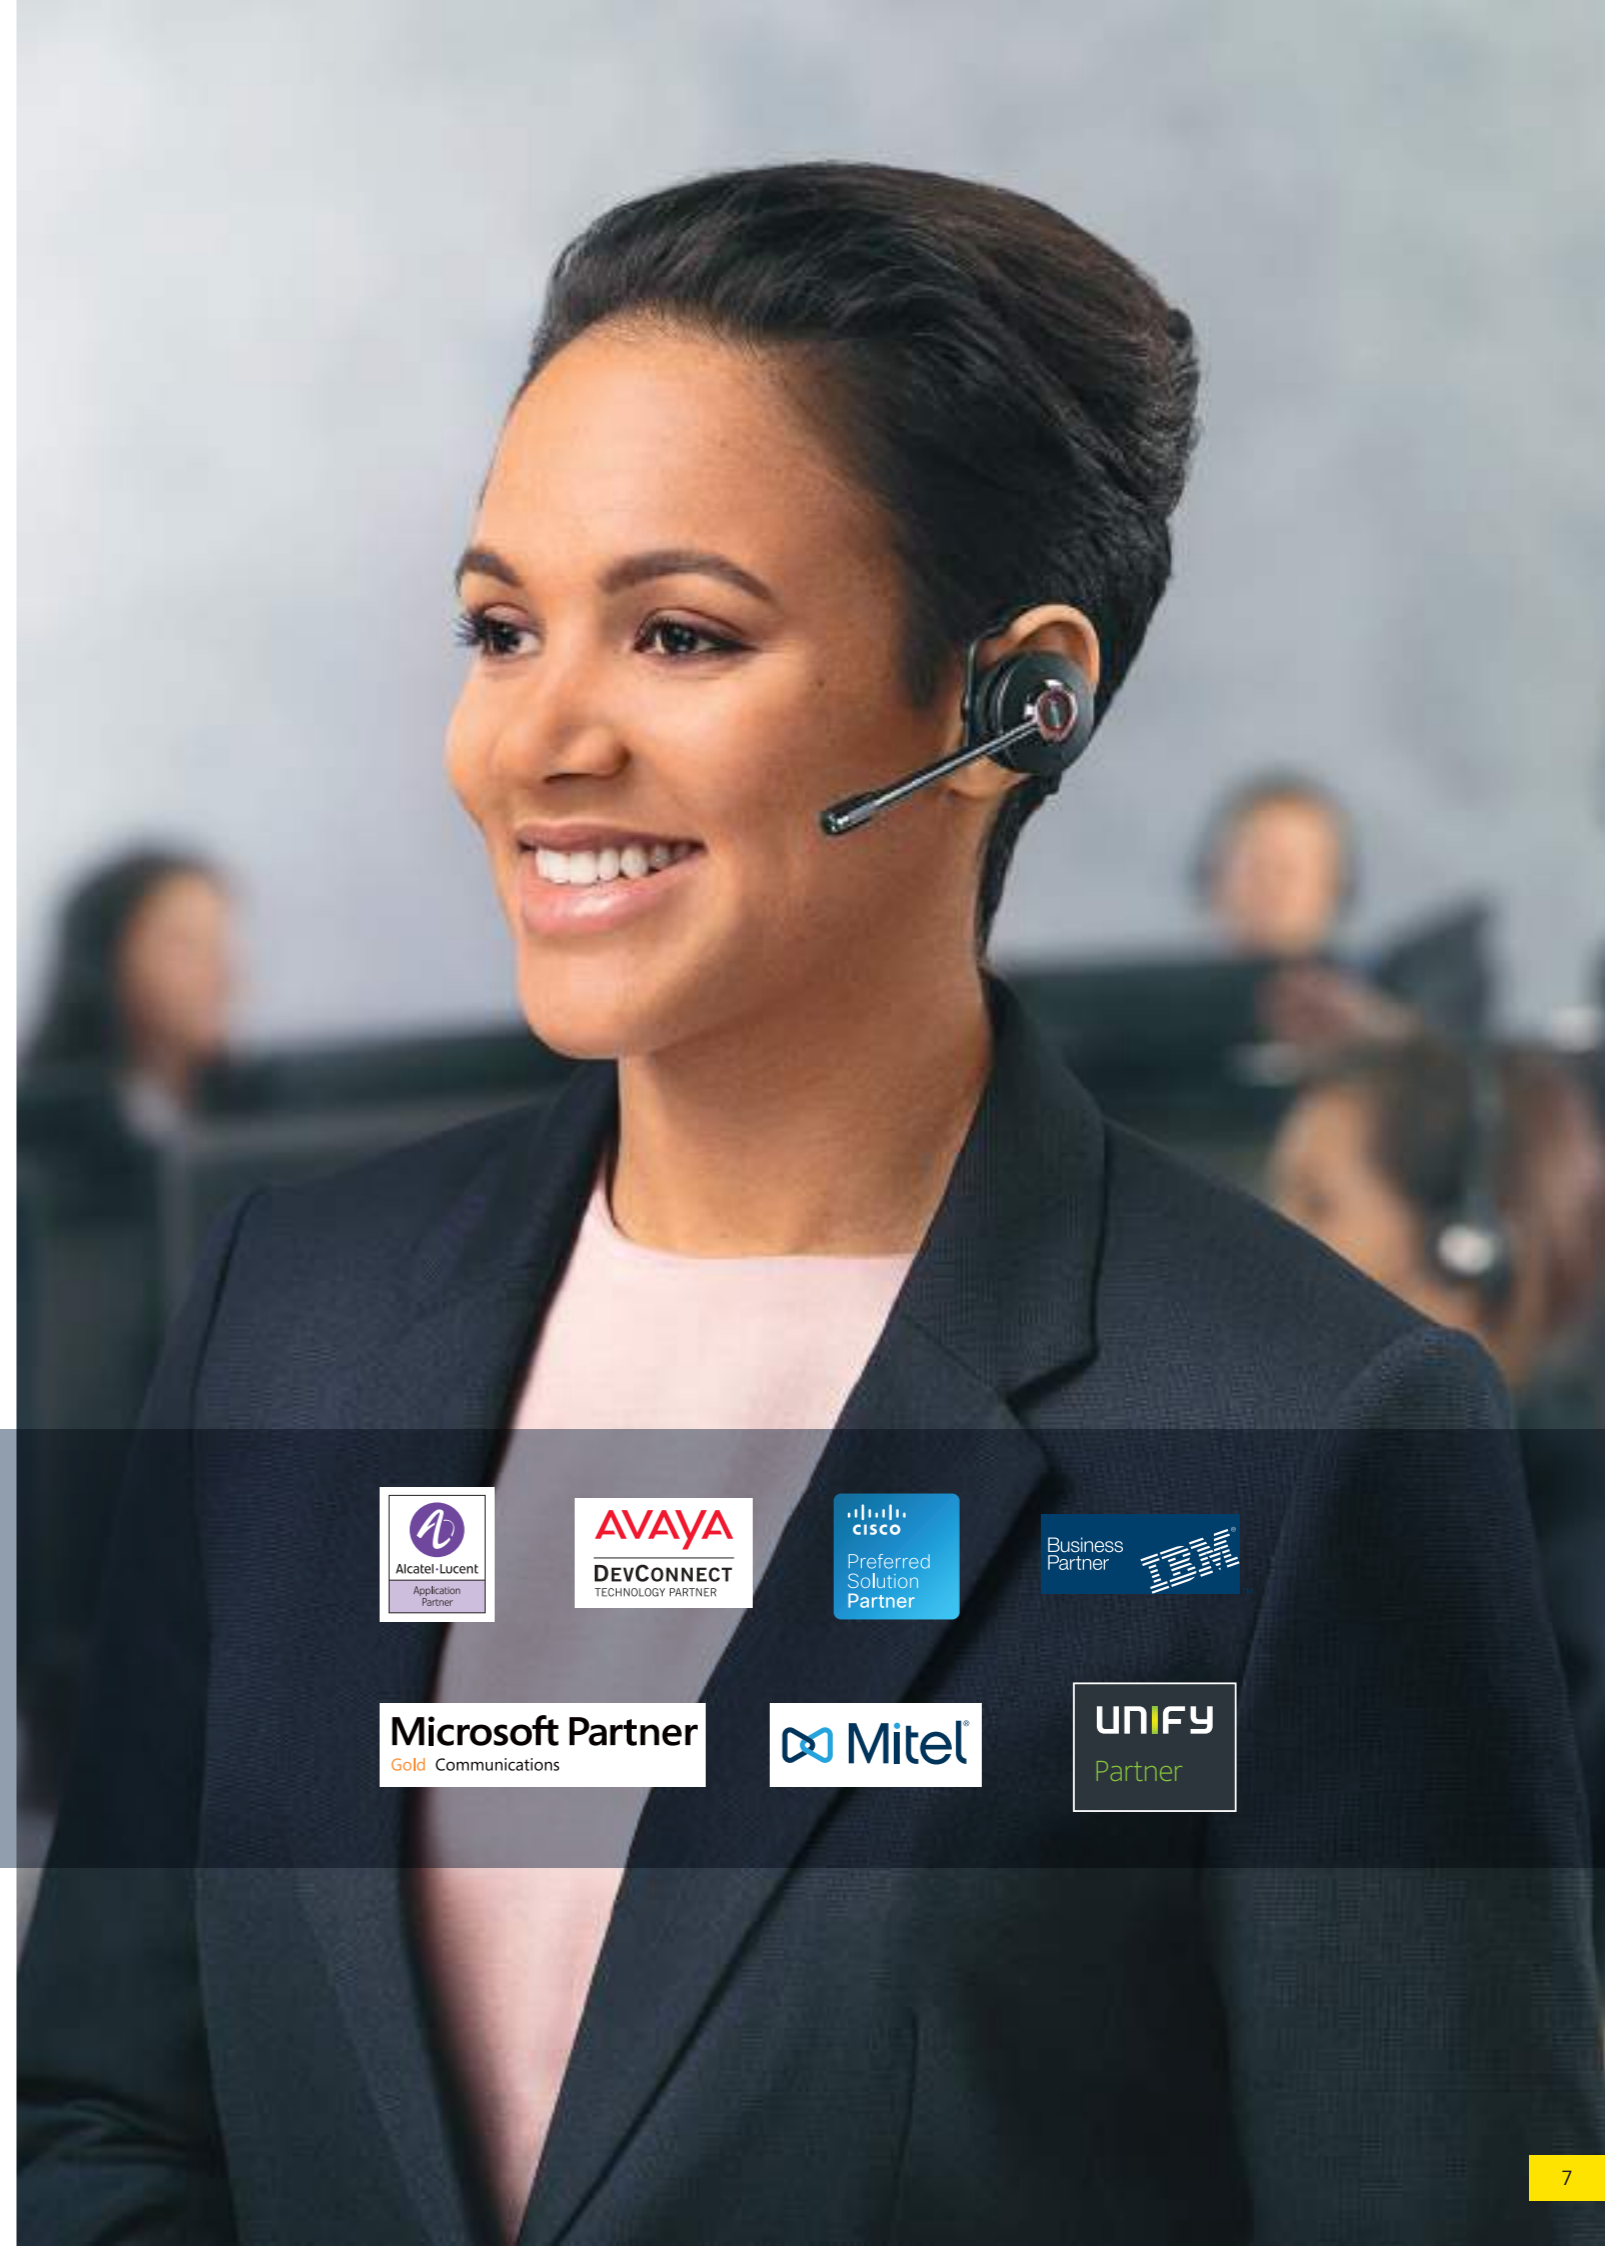

UC makes it easier for people to connect, communicate and collaborate. UC brings together all office communication devices into a single, integrated application and user experience. This includes replacing traditional telephones with softphones.

With a UC solution in place, employees are more productive, interactions are smoother, and you get tangible cost reductions. This provides a very compelling business case for **companies**.

Perfection in partnership

Strategic alliances

We design, develop and test our sound solutions in close co-operation with the market's leading telecom and UC providers. We have earned the certification and endorsement of Microsoft, Cisco, Avaya, Unify, Alcatel, and many others. We work closely with them to integrate our products into the current and new generations of their UC solutions – which is why we're the market leader in UC-optimized sound devices.

New ways of working

Hacking Productivity in the Office: The Right Technology, Optimized

“These days even
instant gratification
takes too long.”

Carrie Fisher

We live in a fast-paced world and sometimes, from our insatiable need for speed, we miss the forest for the trees. At work we often confuse purpose and productivity. Today’s fast-as-light business climate might be vital for survival, but it often drains our finances, stifles innovation and exhausts employees.

How do we find new ways of working that accommodate today’s productivity targets but also enhance employee needs and the freedom to innovate? Finding the ‘optimal tools’ is an important part of the process. Work is no longer a place that you go to, but an activity that you engage in, regardless of place, and often regardless of time. Dispersed teams and community management are the new order of business.

These new challenges are reflected in the products Jabra takes to market. They are invented with the individual in mind, and recognize that greater productivity must be coupled with choices about the technology we use.

Our philosophy for New Ways of Working is built around the idea of organizing work with a focus on people reaching their full potential. Managers and employees alike make deliberate choices about workmodes – whether collaboration, concentration, conversation or communication – and for each, there are right tools for the job.

New Ways of Working is about surrounding ourselves with applicable technologies and processes, and a culture that helps us to achieve our full potential.

We’ve all heard the expression “Work smarter, not harder.” At Jabra, we’re dedicated to giving you the right tools to achieve this.

Meeting your communication needs

Our world of end-users, divided into three distinct use case categories

Call centric

Our Call Centric solutions are for agents, civil servants, traders and financial advisors who listen and talk for a living over the phone with customers to raise customer satisfaction by solving their problems. Conversation is key to their work, and they increasingly need to perform in calls in noisy environments that also allows for concentration prior to calls.

- Jabra Engage Series
- Jabra Biz Series
- Jabra Pro Series

Task-based

Our Task-based solutions are for back office functions like marketing, R&D, supply chain, etc. whose work requires a high degree of concentration throughout the day. These solutions are also geared towards those who often need to share their knowledge with colleagues and external stakeholders through online based collaboration.

- Jabra Evolve Series
- Jabra Speak Series

Calls-on-the-move

Our Calls-on-the-move solutions are for those who work with a high degree of mobility outside the office. They need to make calls while driving from one sales meeting to the next, or when moving from one location to another. For such professionals, hands-free calls are not an optional benefit – they're a requirement.

- Jabra Motion Series
- Jabra Stealth UC

Call centric

Solutions for agents, civil servants, traders and financial advisors who listen and talk for a living over the phone with customers to raise customer satisfaction by solving their problems.

Jabra Engage Series

It's time to fully engage with your customers

Do you need to ensure great-sounding customer calls – but work from a busy, often noisy office? Do you want to enhance customer experience? Looking to boost your team's productivity?

Meet the **Jabra Engage Series** – engineered to enhance customer satisfaction.

Jabra Engage Wireless Headsets

Advanced technology increases wireless density and delivers a superior overall sound experience.

Crystal clear calls

Engage features an advanced noise-cancelling microphone, enhanced speakers, and meets Skype for Business Open Office requirements*.

Industry-leading wireless performance

Take calls up to 150 meters/490 feet from the desk. Density capacity enables 3 times as many users to effectively work wirelessly in the same office space.

Boost productivity

Engage features all-day battery life and an integrated busylight acts as a 'do-not-disturb sign'.

Stronger security

Jabra Engage has security features which go beyond DECT Security Level C, making it the most secure wireless headset on the market.

Be better connected

Connect up to 5* phones simultaneously.

Choice of wearing options

Choose from stereo, mono and lightweight convertible wearing styles.

The Jabra Engage 50

Engineered to be the world's best professional digital corded headset*

Are you going digital with your contact center? The Jabra Engage 50 is the ideal headset to deliver customer satisfaction in an increasingly digital environment.

Did you know?

Engage 50 headsets hold **3 patents**. **54,280 engineering hours** were spent developing the product with intensive testing in Jabra labs.

The Jabra Engage 50 headset is engineered for softphone environments, with features to combat noise and interruptions in the contact center. With a unique, 3-microphone system for superior call quality even in noisy offices and multi-colored status lights to deter interruptions, the Engage 50 is designed to improve customer satisfaction.

Integration with Jabra software enables live agent microphone guidance and rich call analytics to improve the customer experience.

¹ Variant dependent

Task-based

When you're working in an open office or on the go, you need to focus on your tasks and projects. You also need a comfortable and superior call quality solution that suits your environment. This means your productivity will always be on, regardless of your location.

Engineering, evolved.

The Jabra Evolve 75 and Jabra Evolve 75e.

Engineered to be the best professional headsets to enhance productivity in the open office*.

Great sound transforms the way you work. At Jabra, we evolve sound technology so that you can concentrate and work better, be more efficient and, ultimately, be more productive.

We're no strangers to engineering ground-breaking communication solutions – through our parent company, GN, we've been pioneering such work since 1869 – and now more than ever innovative thinking is required to meet your needs.

Challenges in the open office

Open offices are important for sharing knowledge and allowing effective collaboration – but they also come with a lot of challenges. On average, office workers need 23 minutes to re-focus, after being interrupted. Whether you need to block out ambient noise, move freely around your desk, or avoid unnecessary interruptions, the **Evolve 75** goes above and beyond in meeting these needs.

A solution revolution

To solve modern workplace dilemmas, our engineers put 40,000 hours into developing the Evolve 75. Amazing Active Noise Cancellation (ANC) keeps you in the zone, and a busylight acts as a 'Do Not Disturb' sign for your colleagues. Drawing on our acoustic heritage, we were able to optimize the speaker element now found in the Evolve 75 and provide high-quality, crystal-clear sound for both calls and music.

Freedom of movement

We also recognize the need for a headset that fits your life in and outside of work. To meet this need we developed the **Evolve 75e**, the world's first professional UC-certified wireless earbuds. You can use Evolve75e, around the office, and on your commute.

Don't compromise on comfort

The Evolve 75e combines an earbud wearing style and incredible Total Noise Cancellation (combining Active Noise Cancellation with Passive Noise Cancellation). It is certified for Skype for Business, Cisco and more. The specially designed oval-shaped earbuds snugly fit the ear canal without compromising comfort. The specially designed oval-shaped earbuds snugly fit the ear canal without compromising comfort.

Optimize your day

Using advanced 3-microphone technology, the Evolve 75e delivers superior call quality for wireless earbuds and a unique talk-zone. The integrated busylight lets your team know when you're busy. And with a one-touch access to Siri® and Google Assistant™, using Voice Assistants turns into a simple press-and-speak experience.

Technology that works for you

At Jabra we aim to build products that work for you and meet your needs – both in and outside the office. We engineer for purpose. When you use the Evolve 75 and Evolve 75e, we think you'll agree that great sound isn't just made. It's engineered with the purpose of transforming the way you work.

Jabra Noise Guide

See noise levels fall, feel productivity rise

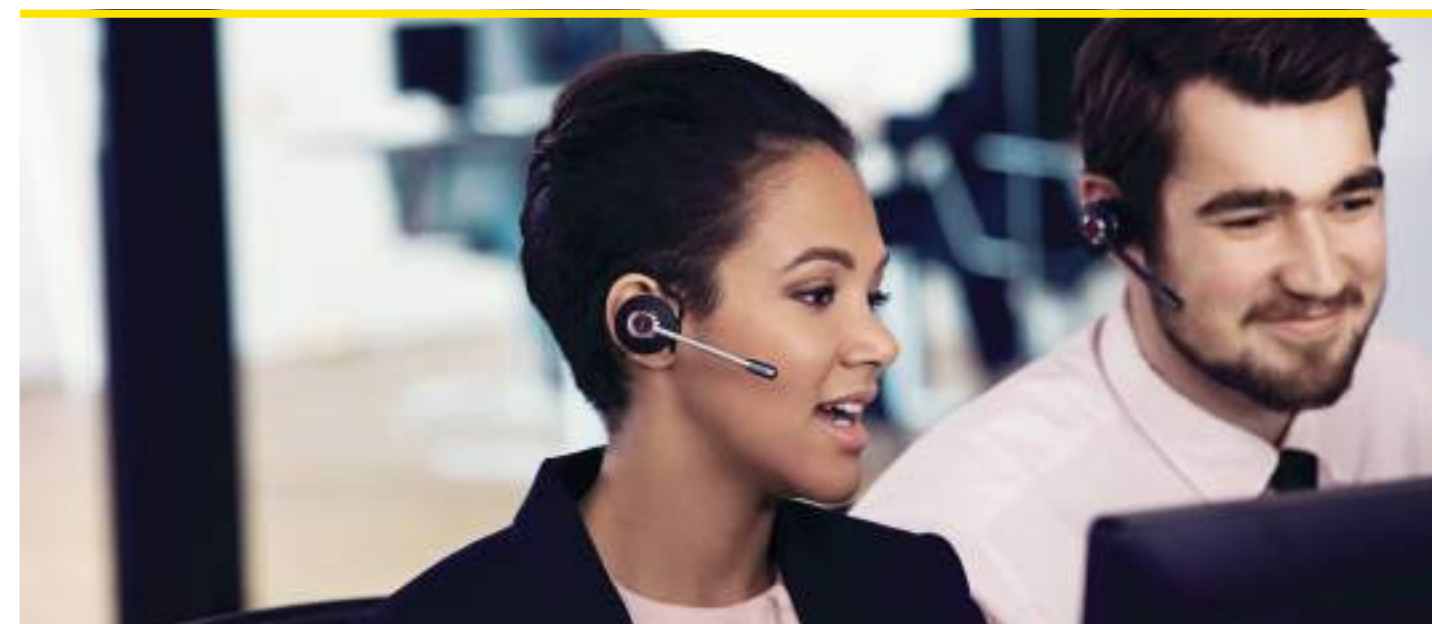

Open-plan offices are becoming increasingly popular. However, as many as 35% of workers state that noise levels from colleagues nearby negatively impacts them. Jabra Noise Guide is a portable device that monitors noise levels and makes people more aware of the impact noise has on their work. You can use it to identify noisy areas and encourage workers to reduce office noise.

- Visual feedback of noise levels, driving positive workplace culture
- Measure underlying noise trends
- Customize sensitivity levels for specific needs
- Data is easily uploaded by a USB cable connected to a PC
- Easy to set up

Work environment:

At office desk

- In-room coverage for up to 6 people
- One Access MS Cortana, Siri®, and Google Assistant™
- Compatible with all leading UC platforms

Jabra Speak 710

Jabra Link 370 USB adaptor

Work environment:

Works with:

Calls-on-the-move

Solutions for those who work with a high degree of mobility outside the office. They need to make calls while driving from one sales meeting to the next, or when moving from one location to another.

Jabra Motion Series

Clear quality calls, wherever you are

The Jabra Motion Series lets you focus on your conversation, not technology, with intuitive features that adapt to your environment and movement. Connect to all your phones with one headset, and transfer calls between phones as you head out the door. Roam up to 100m/330ft and enjoy all-day talk time with exceptional call quality and comfort.

- One headset for all your phones
- Easy and intuitive call control
- 100m/300ft wireless range
- Intelligent Volume Control adjusts call volume automatically
- Up to 7 hours talk time and 15 days stand-by
- Height adjustable and custom fit for optimal comfort
- Power Nap mode to save battery when not in use
- Busylight indicator lets people know you are on the phone

Work environment¹:

Around the office On the go

Works with¹:

Desk phone, softphone, smartphone and tablet

Jabra Stealth UC

Freedom to do more

The smallest and most stylish Bluetooth® Mono headset in its class. The Stealth UC is so sleek and comfortable you will hardly notice you are wearing it.

- Weighing just 7.9 grams/0.28 ounces,
- Compatible with any Bluetooth® enabled device
- Certified for Skype for Business
- Fully UC compatible
- True Plug and Play solution
- Up to 6 hours talk time
- Comes with pre-connected Jabra Link 370 adaptor in the box

Work environment:

On the go

Works with:

Softphone, smartphone and tablet

reddot award 2015 winner

Jabra accessories
Get the most out of your
Jabra audio solution

Jabra accessories

Add the accessories you need to empower your Jabra audio solution and fully meet your specific communication and collaboration requirements.

Amplify your audio – Audio processors

Turns the traditional desk phone headset (QD) into a full digital headset with all the advantages of improved call management and the ability to use the QD headset on both the desk phone and a UC softphone.

Jabra Link 860

Jabra Link 180

Simply seamless – USB enablers

Enhance productivity by connecting the headset to a digital enabler, which increases the functionality. For example you can connect the traditional desk phone headset (QD) to a UC softphone or connect two headsets to the same softphone.

For QD headsets

Jabra Link 230

Jabra Link 260

Jabra 1200 Series

Jabra Link 280

Jabra Link 265

For Bluetooth® headsets

Jabra Link 360

Jabra Link 370

Jabra GN 1000

Jabra Link 14201

Leave the desk behind – Remote Call Control

Using a wireless headset together with a desk-phone becomes much more productive when you can hear and take calls away from the desk. Jabra Remote Call Control solutions enable volume to be adjusted during the call directly on the headset away from the desk phone.

Jabra Dial 550

Jabra Handset 450

Familiar functionality – Handsets

Combine the traditional features of a handset with the benefits of a UC softphone solution.

Jabra software

Complete control. Complete solutions.

Install and connect your Jabra sound devices.

Jabra Direct for Windows

A feature-rich integrated software solution for your headsets. Manage firmware and software updates to:

- Facilitate headset adoption
- Reduce the time spent on headset deployment
- Optimize the conversation experience for customers

All-in-one, user-friendly interface.

Download it free today at jabra.com/direct

Jabra Direct for Mac

Get your Mac softphone and Jabra sound device speaking the same language.

- Control your Mac softphone calls from your Jabra device
- Improve your Jabra device with firmware updates
- Handle Bluetooth® connections between your Mac and Jabra headset

Download it free today at jabra.com/direct

Jabra Sound+ Engineered to personalize your sound

The Jabra Sound+ app provides you with sound that's perfectly suited to your surroundings, wherever you are.

- Personalized sound to suit your surroundings.
- Customize the way Sound+ delivers your sound and how it looks.
- Choose your preferred voice assistant. Select between Amazon Alexa, Siri®, Google Assistant™ and more.

To learn more, go to jabra.com

Jabra Xpress

Jabra Xpress is a software solution designed for IT professionals to 100% remotely manage Jabra USB devices with a set of smart tools. Jabra Xpress ensures:

- Easy mass deployment
- Smart asset management
- Agile maintenance

To accelerate UC adoption and maximize Jabra headset ROI, download Jabra Xpress today at jabra.com/xpress

Jabra headset technology

Quality as standard

Standard features that take your communication to the next level.

Comfort

Most Jabra headsets have a choice of up to three different wearing styles for the most comfortable and customizable fit.

DECT vs. Bluetooth® Technology

DECT – Best possible range and density performance. Bluetooth – When mobility with one solution, in and outside of the office, is a key need.

Digital Signal Processing (DSP)

DSP technology optimizes sound performance by filtering out distracting background noise, reducing call handling times and potential misunderstandings.

HD Voice – Wideband audio

Enjoy life-like, vibrant conversations that let you focus on the content of the call instead of struggling to hear the person on the other end of the line.

High Durability

Every headset is subject to extensive testing, everything from cable flexing over boom arm rotations to acoustic tests. Durability cuts costs and saves time.

Mono or Stereo speaker

For many of our headsets, you can choose between mono (one) and stereo (two) speakers, depending on your work environment or your personal preference.

Noise Blackout™

Jabra Noise Blackout technology eliminates disturbing background noise such as wind, surrounding conversations or traffic to enhance your voice.

Noise Cancellation

Choose between different noise canceling microphones that filter out unwanted background noise. Great for use in noisier, open office environments.

Optimized for Skype for Business

The vast majority of Jabra products come in standard variants or variants that have been optimized for Microsoft.

PeakStop™

PeakStop technology, included with all Jabra headsets, immediately removes potentially harmful loud sounds or tones before they reach your ears and keep the sound level within a safe range to protect your hearing.

Remote Call Control (RCC)

RCC gives you call control with your wireless headset from your desk phone, using either an Electronic Hook Switch (EHS) cable or a mechanical handset lifter (Jabra GN1000).

SafeTone™

SafeTone technology, included with selected Jabra headsets, protects your hearing by cutting off sudden loud noises and maintaining a safe average sound level throughout the day – meeting EU noise at work compliance and NA recommendations. jabra.com/hearingprotection

Secure Wireless Calls

All wireless office headsets digitally encrypt the signal between the headset and the base. That's guaranteed confidentiality and peace of mind when you need privacy.

UC Plug-and-Play

Intuitive call control and seamless connection to all leading UC applications and softphones. Easy to set up and easy to use.

Wind Noise Protection

Keep the thread of your conversation in open air environments without any interference. Walk, bike, run and work outside with no need to raise your voice or shout to be heard.

This brochure is intended for use as a sales tool that provides a quick overview of our headset compatibility, which can be kept to hand for your customers. Here you will find, clearly summarized, which headsets are best suited to each telephone/softphone and which requirements must be met for each type. Also explained are a selection and a recommendation of the connection options for all telephones/softphones and headsets. Your Jabra team is happy to assist you with any unlisted phones, headsets and connection options, as well as with older models. Jabra has sought in good faith to put together the information provided herein on the basis of the necessary, available and appropriate information at the time of its creation. Any reference in this catalog is of a general nature and should be verified before any purchase or other activity. Jabra is not responsible for any claims arising from errors or outdated information that appears in this catalog.
